# Smart Promotion Tool

- In order to make business tasks easier and to minimize time to market for the new promotions, a promotion engine called “Smart Promo” is designed according to these requirements.

- SPT is a flexible and efficient solution, it integrates all the functionalities to define and manage promotions for eligible contracts.

Basically, SPT will:

- Define promotion
- Evaluate the Contracts/Customers according the chosen selection criteria.
- Apply the promotion according the chosen application mechanism
- Assign a promotion, free units or MI promotions to eligible Contracts/Customers
